### Pure Honey

## Method

3. As soon as it boils, reduce the heat to the lowest setting. Let it simmer gently for 1.5 to 2 hours. Do not stir during this time. The goal is for the water to evaporate, allowing the fat to rise and thicken.
4. Remove the pan from the heat and allow it to cool to room temperature.
5. Place the entire pan in the refrigerator for at least 10–12 hours (or overnight) to allow the cream to fully solidify.
6. The next day, a thick, yellow-white layer of cream will have formed on top. Cut this layer into squares or strips, roll them up, and lift them off.
7. Serve with a generous drizzle of Capilano Pure Honey.
